### Version

|                       |   |
|-----------------------|---|
| Termination method    | Wave soldering termination                    |
| Connection type       | Motherboard to daughtercard                   |
|                       | Mezzanine                                     |
|                       | PCB to cable                                  |
| Number of contacts    | 48  |
| Contact configuration | Rows z, d and b, positions 2, 4, ... , 30, 32 |
| Termination length    | 3.5 mm  |
| Coding                | Hole coding                                   |
|                       | Shroud coding                                 |
|                       | Coding with loss of contacts                  |
|                       | D20 coding                                    |
| PCB fixing            | With fixing flange                            |

### Technical characteristics

|                                    |   |
|------------------------------------|---|
| Contact rows                       | 3   |
| Contact spacing (termination side) | 5.08 mm   |
|                                    | 5.08 mm   |
| Contact spacing (mating side)      | 3.81 mm   |
|                                    | 5.08 mm   |
| Rated current                      | 6 A   |
| Rated current                      | Rated current measured at 20 °C, see derating curve for details |
| Clearance distance                 | ≥1.6 mm   |
| Creepage distance                  | ≥3 mm   |
| Insulation resistance              | >10 <sup>12</sup> Ω   |
| Contact resistance                 | ≤15 mΩ  |

Pushing Performance  
Since 1945

## Technical characteristics

|                                |                           |
|--------------------------------|---------------------------|
| Limiting temperature           | -55 ... +125 °C           |
| Insertion and withdrawal force | ≤75 N                     |
| Performance level              | 1<br>acc. to IEC 60603-2  |
| Mating cycles                  | ≥500                      |
| Test voltage $U_{r.m.s.}$      | 1.55 kV (contact-contact) |
| Isolation group                | IIIa (175 ≤ CTI < 400)    |
| Hot plugging                   | No                        |

## Material properties

|   |  |
|---|--|
| Material (insert)                         | Thermoplastic resin, glass-fibre filled                        |
| Colour (insert)                           | RAL 7032 (pebble grey)   |
| Material (contacts)                       | Copper alloy   |
| Surface (contacts)                        | Noble metal over Ni Mating side<br>Sn over Ni Termination side |
| Material flammability class acc. to UL 94 | V-0  |
| RoHS                                      | compliant with exemption                                       |
| RoHS exemptions                           | 6(c): Copper alloy containing up to 4 % lead by weight         |
| ELV status                                | compliant with exemption                                       |
| China RoHS                                | 50   |
| REACH Annex XVII substances               | Not contained  |
| REACH ANNEX XIV substances                | Not contained  |
| REACH SVHC substances                     | Yes  |
| REACH SVHC substances                     | Lead   |
| ECHA SCIP number                          | be45dcda-0f90-459a-a8bc-78fb7986a295                           |
| California Proposition 65 substances      | Yes  |
| California Proposition 65 substances      | Lead<br>Nickel   |

## Specifications and approvals

|                        |  |
|------------------------|--|
| Specifications         | IEC 60603-2 (complementary)                                |
| UL / CSA               | UL 1977 ECBT2.E102079<br>CSA-C22.2 No. 182.3 ECBT8.E102079 |
| Railway classification | F1/I2 acc. to NFF 16-101/102                               |

Since 1945

## Commercial data

|                                |  |
|--------------------------------|--|
| Packaging size                 | 10                                       |
| Net weight                     | 20.04 g                                  |
| Country of origin              | Romania                                  |
| European customs tariff number | 85366990                                 |
| GTIN                           | 5713140011359                            |
| eCl@ss                         | 27460201 PCB connector (board connector) |

## Current carrying capacity

The current carrying capacity of the connectors is limited by the thermal load capability of the contact element material including the connections and the insulating parts. The derating curve is therefore valid for currents which flow constantly (non-intermittent) through each contact element of the connector evenly, without exceeding the allowed maximum temperature.  
Measuring and testing techniques acc. to IEC 60512-5-2

Hole coding  
(without loss of contact)

To avoid cross-plugging of adjacent connectors a coding system is required. Drill out the male connector at pre-centered point according to the sketch. Use the setting tool 09 99 000 0103 to insert the coding pin 09 06 000 9950 into the existing hole in the female connector.

Shroud coding  
(without loss of contact)

To avoid cross-plugging of adjacent connectors a coding system is required. Insert the code key 09 06 001 9919 into one of the keyways of the female connector as shown in the drawing. Break out the corresponding area of the male shroud. Connectors coded this way can only be applied in a minimum rack spacing of 20.32 mm.

### Coding with loss of contacts

To avoid cross-plugging of adjacent connectors a coding system is required.

The coding is achieved by means of a code pin which is inserted into the selected chamber of the female connector (the contact cavity must be filled with a female contact!).

The opposite male contact must be removed with the help of the specially designed tool. It's recommended to use at least 3 pins.

Coding pin 09 04 000 9908

Removal tool for male contacts 09 99 000 0038

### Soldering instructions

The connectors should be protected when being soldered. Otherwise, they might become contaminated as a result of soldering operations or deformed as a result of overheating.

1) For prototypes and short runs protect the connectors with an industrial adhesive tape, e.g. Tesaband 4331 ([www.tesa.de](http://www.tesa.de)). Cover the underside of the connector moulding and the adjacent parts of the pcb as well as the open sides of the connector. This will prevent heat and gases of the soldering apparatus from damaging the connector. About 140 + 5 mm of the tape should suffice.

2) For large series a jig is recommended. Its protective cover with a fast action mechanical locking device shields the connectors from gas and heat generated by the soldering apparatus. As an additional protection a foil can be used for covering the parts that should not be soldered.

### Mating conditions

To ensure reliable connections and prevent unnecessary damage, please refer to the application data diagrams.

These recommendations are set out in IEC 60603-2.

The connectors should not be coupled and decoupled under electrical load.
