Small - 15mm – SmartiPi Touch back cover

- SM-CVRS

SmartiPi Touch back cover

These simple covers screw into the back VESA mounts on the SmartiPi Touch with the four included screws. They allow you to protect HAT boards and other electronic components that you might want for your project.

You can choose between a 15mm deep cover and 37mm deep cover.

They are made of ABS plastic and will have to be cut, drilled, or modified for your application. The case also helps protect the ethernet and USB ports on the Pi B+,2 and 3.

Four mounting screws included
