

3M™ Protective Eyewear

Eye Injuries are Prevalent in the Workplace

Every day, approximately 2,000 U.S. workers sustain a work-related eye injury that requires medical treatment.¹ This is a problem for both employers and their workers, because about 1 in 10 injuries require one or more missed workdays to recover.²

Eye injuries occur for two main reasons:

- **Not wearing eye protection.**

Nearly three out of every five workers injured are not wearing eye protection at the time of the accident.³

- **Wearing the wrong eye protection for the job.**

40% of the injured workers were wearing some form of eye protection when the accident occurred. However, these workers were most likely to be wearing protective eyeglasses that offered inadequate eye protection.³

Most Eye Injuries are Preventable

Experts believe that the correct eye protection could lessen the severity of or even prevent 90% of eye injuries.⁴ Compliance and education play a major role in preventing these injuries.

- **Compliance**

In jobs where eye protection is required, to be effective, the eyewear must be of the appropriate type for the hazard encountered and properly fitted.³

- **Education**

Even though the vast majority of employers furnished eye protection at no cost to employees, about 40% of the workers received no information on where and what kind of eyewear should be used.³

3M Protective Eyewear

3M protective eyewear features the comfort and adjustability that professionals need for extended wear. With over 400 options in a wide range of styles, lens tints, coatings and shades, 3M protective eyewear offers solutions for almost every environment.

Multiple Lens Tints and Coatings

3M offers a variety of task specific lenses and tints to help reduce glare, eye stress and fatigue, as well as a range of lens coatings—from standard Hard Coat and Anti-Fog to 3M's exclusive coatings, such as Rugged Anti-Scratch (RAS) and DX™ Anti-Fog Hard Coat.

Cool and Contemporary Styles

Style is a critical factor when it comes to raising the acceptance of the user to wear personal protective equipment (PPE). 3M's range of eyewear offers a variety of modern and stylish products.

Extensive Eyewear Line

3M's extensive full line of protective eyewear includes economical and value-oriented models, as well as unique premium products. Some models are available in readers and goggles. 3M also offers eyewear that is compatible with some personal protective equipment, such as earmuffs and hard hats.

Compliant

All 3M protective eyewear and goggles meet the High Impact Requirements of ANSI Z87.1-2003 or ANSI Z87.1-2010, depending on the model, and provide UV protection—polycarbonate lenses absorb 99.9% UVA and UVB.

Premium Protective Eyewear

Changing outdoor light conditions doesn't require changing eyewear anymore.

Smart Lens™

UPC: 10078371620339

Product #: 13407-00000-5

Features and Benefits

- Photochromic lens lightens and darkens with changing outdoor light conditions
 - Light to dark in less than 20 seconds
 - Dark to light in less than 3 minutes
- Anti-Fog Lens
- Soft, adjustable nose bridge
- Durable frame with nylon brow and magnesium alloy temples
- Spring-hinged temples for narrow or wide fit
- Polycarbonate lenses absorb 99.9% UVA and UVB
- Includes microfiber storage bag and lanyard

Safety directors should assess their particular workplace and make all people wearing Smart Lens™ photochromic eyewear aware of the time required for the lens transition. Special care should be taken when moving from outdoors to indoors. Outdoor temperatures may affect the lens transmission time. Do not store on vehicle dashboard. Prolonged exposure to intense heat can damage eyewear. Always store Smart Lens in protective bag.

Other 3M™ Premium Protective Eyewear

3M™ Prescription (SRx) Eyewear

3M™ Prescription Eyewear (SRx)

3M's safety prescription eyewear is engineered to help provide employees who have prescriptions with the eye protection they need to work in a wide variety of environments. Using the latest in lens and coating technologies, 3M safety prescription eyewear is durable and helps improve visual acuity.

A Comprehensive Selection of Frame Styles

With over 60 choices, 3M's frame collection features a variety of fitting characteristics to improve comfort, including soft adjustable nose pads, comfort nose bridges, spring hinge flex temples and adjustable length temples.

All products feature lateral coverage either integrated into the frame design or as separately attached sideshields.

Compliant

All 3M prescription eyewear frames meet the requirements of ANSI Z87.1-2003 or ANSI Z87.1-2010, depending on the model.

Lens Materials, Options and Coatings

3M offers many lens material options, which offer a wide range of impact protection. They include Polycarbonate, Trivex®, plastic and glass.

You can choose from a variety of lens options, including Progressive Addition Lens designs. For sun protection, we offer Transitions® and Life Rx® photochromic lenses, as well as Polarized lenses. Coating options include SuperCote™, Anti-Reflective and Anti-Fog coatings.

Eyewear Protection for Every Employee

See 3M.com/PPESafety for more product selection.

Popular 3M™ Prescription Eyewear Styles

ZT200
