

MDCSK51-22-18-A

Ruland MDCSK51-22-18-A, 22mm x 18mm Single Disc Coupling, Aluminum, Clamp Style With Keyway, 50.8mm OD, 46.1mm Length

Description

Ruland MDCSK51-22-18-A is a clamp single disc coupling with 22mm x 18mm bores, 50.8mm OD, 46.1mm length, and 6mm x 6mm keyways. It is zero-backlash and has a balanced design for reduced vibration at high speeds. The single disc design is comprised of two anodized aluminum hubs and two sets of thin stainless steel disc springs which can accommodate angular misalignment and axial motion, however does not allow for any parallel misalignment. MDCSK51-22-18-A is lightweight and has low inertia making it well suited for applications with speeds up to 10,000 RPM. Hardware is metric and tests beyond DIN 912 12.9 standards for maximum torque capabilities. Ruland manufactures MDCSK51-22-18-A to be torisionally rigid and an excellent fit for precise positioning stepper servo applications commonly found in semiconductor, solar, printing, machine tool, and test and measurement systems. It is machined from solid bar stock that is sourced exclusively from North American mills and RoHS3 and REACH compliant. MDCSK51-22-18-A is manufactured in our Marlborough, MA factory under strict controls using proprietary processes.

Product Specifications

Bore (B1)	22 mm	Small Bore (B2)	18 mm
Keyway (K1)	6 mm	Keyway (K2)	6 mm
B1 Max Shaft Penetration	22.2 mm	B2 Max Shaft Penetration	22.2 mm
Outer Diameter (OD)	50.8 mm	Bore Tolerance	+0.03 mm / -0.00 mm
Length (L)	46.1 mm	Hub Width (LH)	20.6 mm
Recommended Shaft Tolerance	+0.000 mm / -0.013 mm	Forged Clamp Screw	M5
Screw Material	Alloy Steel	Hex Wrench Size	4.0 mm
Screw Finish	Black Oxide	Seating Torque	9.5 Nm
Number of Screws	2 ea	Dynamic Torque Reversing	9.90 Nm
Angular Misalignment	1.0°	Dynamic Torque Non-Reversing	19.80 Nm
Parallel Misalignment	0.00 mm	Static Torque	39.6 Nm
Axial Motion	0.32 mm	Torsional Stiffness	98.0 Nm/Deg
Moment of Inertia	7.334 x 10 ⁻⁵ kg-m ²	Maximum Speed	10,000 RPM
Zero-Backlash?	Yes	Balanced Design	Yes
Torque Wrench	TW:BT-4C-3/8-86	Recommended Hex Key	Metric Hex Keys

Installation Instructions

- Align the bores of the MDCSK51-22-18-A single disc coupling on the shafts that are to be joined and determine if the misalignment parameters are within the limits of the coupling. (*Angular Misialignment*: 1.0°, *Parallel Misalignment*: 0.00 mm, *Axial Motion*: 0.32 mm)
- 2. Fully tighten the M5 screw on the first hub to the recommended seating torque of 9.5 Nm using a 4.0 mm hex torque wrench.
- 3. Before tightening the screw on the second hub, rotate the coupling by hand to allow it to reach its free length.
- 4. Tighten the screw on the second hub to the recommended seating torque. Make sure the coupling remains axially relaxed and the misalignment angle remains centered along the length of the coupling.
- 5. The shafts may extend into the relieved portion of the bore as long as it does not exceed the shaft penetration length of 22.2 mm.
