

MT10/10-CB2W-AN

Ruland Two-Way Base Connector, Thru Hole 10mm, Base Diameter 38mm, Black Anodized Aluminum

Description

Ruland MT10/10-CB2W-AN is a two-way base connector with a 38mm base diameter, 10mm round thru holes, an 8mm square thru hole, M5 clamp screws, and an overall length of 24mm. It is designed to fit with Ruland tubes that begin with MT10. MT10/10-CB2W-AN is aluminum with a black anodized finish and screws are 304 stainless steel for added corrosion resistance when compared to unplated types. This two-way base connector is typically used as a base in support structures for mounting sensors, screens, reflectors, plexiglass machine guards, and other industrial components. It can be permanently installed on extruded aluminum frames, sheet metal, and other surfaces using M5 hardware or the user can opt for portability by using MAGNET-43-27 magnetic base. MT10/10-CB2W-AN can have MT10 round and square tubes installed vertically and/or horizontally giving system designers a high degree of flexibility to customize the base to the needs of applications throughout the equipment. MT10:12-ALK-M5-20 adjustable clamping handles can be used in place of standard hardware if rapid fine repositioning of the tube is required. MT10/10-CB2W-AN is manufactured by Otto Ganter, inventoried by Ruland, and RoHS3 compliant.
