| Speed class | Write speed: up to 60 MB/s (UDMA6), read speed: up to 100 MB/s (UDMA6) |
| SLC flash write cycles | 17; TB; number of write cycles determines the lifetime - with flash mass storage devices, the maximum number of possible write cycles is limited due to the physical properties of the flash cells. The intelligent data management of the flash controller ensures that the write cycle count of the mass storage device far surpasses the write cycles of a single flash memory cell. To ensure overall performance, it is recommended not use the memory area completely. |
