SIEMENS

Data sheet US2:22BUC32BD

Class 22

Reversing motor starter, Size 00, Three phase full voltage, Solid-state overload relay, OLR amp range 3-12A, 208VAC 60Hz coil, Noncombination type, Enclosure type 1, Indoor general purpose use, Standard width enclosure

Figure similar

product brand name

product branchiane	0.000 22
design of the product	Full-voltage reversing motor starter
special product feature	ESP200 overload relay
General technical data	
weight [lb]	23 lb
Height x Width x Depth [in]	20 × 12 × 8 in
touch protection against electrical shock	NA for enclosed products
installation altitude [ft] at height above sea level maximum	6560 ft
ambient temperature [°F]	
 during storage 	-22 +149 °F
during operation	-4 +104 °F
ambient temperature	
during storage	-30 +65 °C
during operation	-20 +40 °C
country of origin	USA
Horsepower ratings	
yielded mechanical performance [hp] for 3-phase AC motor	
at 200/208 V rated value	1.5 hp
• at 220/230 V rated value	1.5 hp
• at 460/480 V rated value	2 hp
• at 575/600 V rated value	0 hp
Contactor	
size of contactor	NEMA controller size 00
number of NO contacts for main contacts	3
operating voltage for main current circuit at AC at 60 Hz maximum	600 V
operational current at AC at 600 V rated value	9 A
mechanical service life (switching cycles) of the main contacts typical	10000000
Auxiliary contact	
number of NC contacts at contactor for auxiliary contacts	0
number of NO contacts at contactor for auxiliary contacts	1
number of total auxiliary contacts maximum	8
contact rating of auxiliary contacts of contactor according to UL	10A@600VAC (A600), 5A@600VDC (P600)
Coil	
type of voltage of the control supply voltage	AC
holding power at AC minimum	8.6 W

apparent pick-up power of magnet coil at AC apparent noiding power of magnet coil at AC operating range factor control supply voltage rated value of magnet coil precental drop-out voltage of magnet coil related to the input voltage ON-delay time OFF-delay time OVerload rolay product function • overload protection • phase failure detection • phase failure detection • passymmetry detection • ground fault detection • external reset reset function • external reset reset function • cottenad solution adjusted by the current dependent overload relays make time with automatic start after power failure maximum relative repeat accuracy product feature protective coating on printed-circuit board number of NC contacts of auxiliary contacts of overload relay operational current of auxiliary contacts of overload relay • at AC at 800 V • at DC at 250 V • at DC at 250 V • at DC at 250 V • with multi-phase operation at AC rated value • with multi-phase operation of the supply voltage line-side tightening torque [lbf-in] for supply type of electrical connection for supply voltage line-side tightening torque [lbf-in] for supply type of electrical connectable conductor cross-sections at line-side tightening torque [lbf-in] for supply type of electrical connectable conductor cross-sections at line-side tightening torque [lbf-in] for supply type of electrical connectable conductor cross-sections at line-side tightening torque [lbf-in] for supply type of electrical connectable conductor cross-sections at line-side tightening torque [lbf-in] for supply type of electrical connectable conductor cross-sections at line-side tightening torque [lbf-in] for supply type of electrical connectable conductor cross-sections at line-side tightening torque [lbf-in] for supply type of electrical connectable conductor cross-sections at line-side tightening torque [lbf-in] for supply type of connectable conductor

degree of protection NEMA rating design of the housing indoors, usable on a general basis Mounting/wiring mounting position fastening method type of electrical connection for supply voltage line-side tightening torque [lbf-in] for supply type of connectable conductor cross-sections at line-side 1 (14 2 AWG)
design of the housing indoors, usable on a general basis Mounting/wiring mounting position Vertical fastening method Surface mounting and installation type of electrical connection for supply voltage line-side Screw-type terminals tightening torque [lbf-in] for supply 20 20 lbf-in type of connectable conductor cross-sections at line-side 1x (14 2 AWG)
Mounting/wiring Vertical fastening method Surface mounting and installation type of electrical connection for supply voltage line-side Screw-type terminals tightening torque [lbf·in] for supply 20 20 lbf·in type of connectable conductor cross-sections at line-side 1x (14 2 AWG)
mounting position fastening method type of electrical connection for supply voltage line-side tightening torque [lbf·in] for supply type of connectable conductor cross-sections at line-side 1x (14 2 AWG)
fastening method type of electrical connection for supply voltage line-side tightening torque [lbf-in] for supply type of connectable conductor cross-sections at line-side 1x (14 2 AWG)
type of electrical connection for supply voltage line-side tightening torque [lbf·in] for supply 20 20 lbf·in type of connectable conductor cross-sections at line-side 1x (14 2 AWG)
tightening torque [lbf·in] for supply 20 20 lbf·in type of connectable conductor cross-sections at line-side 1x (14 2 AWG)
type of connectable conductor cross-sections at line-side 1x (14 2 AWG)
temperature of the conductor for supply maximum permissible 75 °C
material of the conductor for supply AL or CU
type of electrical connection for load-side outgoing feeder Screw-type terminals
tightening torque [lbf·in] for load-side outgoing feeder 20 20 lbf·in
type of connectable conductor cross-sections at AWG cables for load-side outgoing feeder single or multi-stranded 1x (14 2 AWG)
temperature of the conductor for load-side outgoing feeder maximum permissible 75 °C
material of the conductor for load-side outgoing feeder AL or CU
type of electrical connection of magnet coil Screw-type terminals
tightening torque [lbf·in] at magnet coil 5 12 lbf·in
type of connectable conductor cross-sections of magnet coil at AWG cables single or multi-stranded
temperature of the conductor at magnet coil maximum 75 °C permissible

material of the conductor at magnet coil	CU
type of electrical connection for auxiliary contacts	Screw-type terminals
tightening torque [lbf·in] at contactor for auxiliary contacts	10 15 lbf·in
type of connectable conductor cross-sections at contactor at AWG cables for auxiliary contacts single or multi-stranded	1x (12 AWG), 2x (16 14 AWG), 2x (18 16 AWG)
temperature of the conductor at contactor for auxiliary contacts maximum permissible	75 °C
material of the conductor at contactor for auxiliary contacts	CU
type of electrical connection at overload relay for auxiliary contacts	Screw-type terminals
tightening torque [lbf·in] at overload relay for auxiliary contacts	7 10 lbf·in
type of connectable conductor cross-sections at overload relay at AWG cables for auxiliary contacts single or multi-stranded	2x (20 14 AWG)
temperature of the conductor at overload relay for auxiliary contacts maximum permissible	75 °C
material of the conductor at overload relay for auxiliary contacts	CU
Short-circuit current rating	
design of the fuse link for short-circuit protection of the main circuit required	10kA@600V (Class H or K); 100kA@600V (Class R or J)
design of the short-circuit trip	Thermal magnetic circuit breaker
breaking capacity maximum short-circuit current (Icu)	
● at 240 V	14 kA
● at 480 V	10 kA
● at 600 V	10 kA
certificate of suitability	NEMA ICS 2; UL 508; CSA 22.2, No.14
