

USB-C to VGA Adapter

MODEL NUMBER: **U444-06N-VGA**

Connects your existing VGA TV, monitor or projector to the USB-C or Thunderbolt 3 port on your tablet, laptop, notebook, MacBook, Chromebook, smartphone or PC.

Description

The U444-06N-VGA USB 3.1 Gen 1 USB-C to VGA Adapter (M/F) helps you transmit 1080p video from your tablet, laptop, Chromebook, MacBook, smartphone or PC to a VGA-enabled television, monitor or projector. It's an ideal tool for giving video presentations in conference rooms and classrooms, editing multiple documents on a larger screen or streaming video for digital signage in crystal-clear 1080p. You can extend video from your primary display to another, duplicate the same video on both displays or change the second display to your primary.

Connect the reversible USB-C plug to your source device's USB-C or Thunderbolt 3 port. The fumble-free USB-C plug connects in either direction to ensure fast, easy connection every time. Then, connect the VGA port to your display using a VGA cable (sold separately).

The U444-06N-VGA adapter supports HD video resolutions up to 1920x1200 (including 1080p) at 60 Hz and USB 3.1 Gen 1 data transfer rates up to 5 Gbps. You can use up to six adapters to connect six additional displays to a Windows device at the same time.

Features
