

Short Male Header Kit for ItsyBitsy

PRODUCT ID: 4173

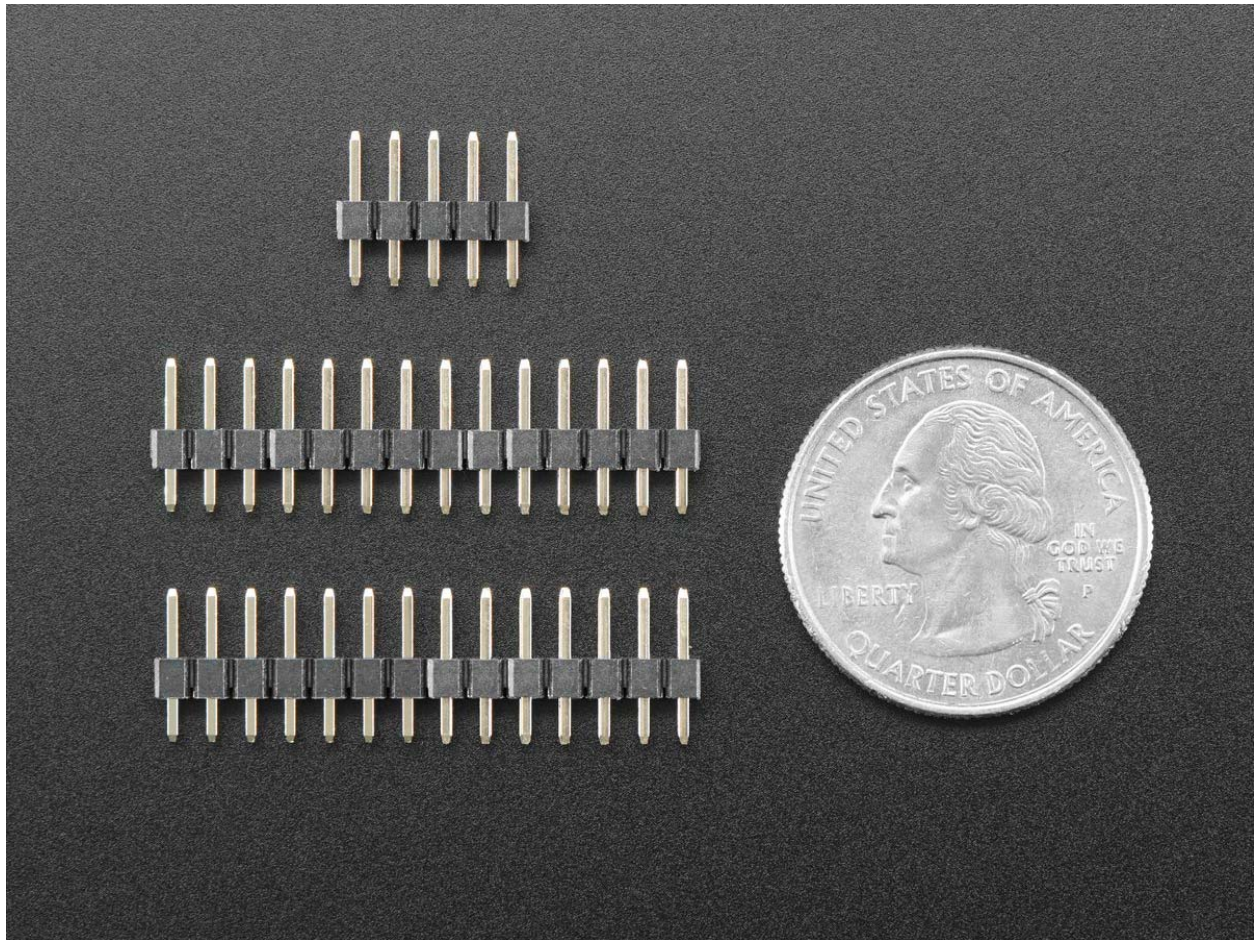

These three Short Male Headers alone are, well, lonely. But pair them with our ItsyBitsy boards, and you're in business!

These headers are particularly cute and tiny and are designed to match perfectly with our shorty female header kit for ItsyBitsy. Note that you *could* use normal header with those headers, but these are short and don't need clipping.

Note: Kit includes two 14-pin and one 5-pin header. ItsyBitsy not included. Doesn't come with the matching female headers, you'll want a set of those too!
