17.3kW 3-Phase Vertical PDU Strip, 208V Outlets (48 C13 & 6 C19), 0U Rack-Mount, Accessory for Select ATS PDUs

MODEL NUMBER: PDU3V602D354B

Required rack-mounted vertical outlet strip accessory for select Tripp Lite 3-phase auto-transfer switch (ATS) PDUs. Distributes AC power to high-density equipment racks in data centers and server rooms.

Description

The PDU3V602D354B 17.3kW 3-Phase Vertical PDU Outlet Strip is a required accessory option for Tripp Lite's PDU360AT6G60 and other 3-phase ATS PDUs that specify compatibility with this model. It's recommended for high-density equipment racks in data centers and server rooms.

When used with Tripp Lite's PDU360AT6G60, the PDU3V602D354B supports up to 17.3kW total output with 27.8A balanced maximum full load per output phase combination (L1-L2, L2-L3, L3-L1) and 13.9A balanced maximum per breaker output load bank (C1-C6).

The 48 C13 and six C19 single-phase 208V outlets are interlaced to help you balance loads by spreading connections across the phase combinations throughout the rack. Each outlet is numbered and color-coded to help you keep track of connected devices and which phase combination powers each. Dual 2.5-ft. (0.76 m) power cords, each with a special seven-position input plug, connect directly to the ATS's rear receptacles.

The PDU3V602D354B's rugged all-metal housing mounts vertically in an EIA-standard 19-inch rack with no tools needed. Vertical 0U installation reduces cord clutter and improves airflow through the rack.
