

**BASE**

Glass-fibre reinforced polyamide based (PA) technopolymer, black colour, matte finish.

**ARTICULATED THROUGH STEM**

Threaded zinc-plated steel with regulation hexagon.

Assembled to the base by means of zinc-plated steel set screw and washer.

**CUP WASHER FOR STEM BEARING**

Glossy zinc-plated steel.

**STANDARD EXECUTIONS**

- **LV.F-ACV**: without no-slip disk.
- **LV.F-ACV-AS**: with NBR rubber no-slip disk, hardness 90 Shore A, supplied assembled, reinforced with zinc-plated steel plate, fixed by means of two screws.

**GROUND MOUNTING**

By means of two holes at 180°, supplied covered by a diaphragm (which can be easily removed by a metal tool), to avoid all unhealthy deposits of dirt and dust when the ground mounting is not required (see Fig. 1).

**FEATURES**

The special knurling under the lower lip of the base provides excellent stability and grip when using the levelling element without no-slip disk even on surfaces that are not perfectly flat. The components of the levelling elements (base and stem) are supplied already assembled.

**ACCESSORIES ON REQUEST**

Zinc-plated steel nut (see Nuts NT. on page 1283).

**SPECIAL EXECUTIONS ON REQUEST**

AISI 304 stainless steel stems.

\* The max static load is the value above which the load applied to the element may cause some plastic material breakage, in particular conditions of use. Obviously, a factor that takes into consideration the importance and the safety level of the specific application must be applied to this value.

# Data with no-slip disk mounted.
