

## USB 2.0 Active Extension Repeater Cable (A M/F), 10M (32.8 ft.)

MODEL NUMBER: **U026-10M**

### Description

Tripp Lite's 10-meter ( 33 ft. ) USB 2.0 active extension cable is a bus powered extension cable that can be used to increase the length of a device cable without the worry of signal loss and potential performance problems. USB limits a cable's length to 16-ft. (4.88 m) Any length above 16-ft. (4.88 m) requires the use of an active cable such as this one. This cable has a signal booster built in. The overall cable length can be extended up to 131-ft. (39.92 m) by daisy chaining up to 4 of these active cables. The cable must be plugged directly into a USB port (either on the PC or a hub). Use a standard 6-ft. (1.83 m), 10-ft. (3.05 m), or 15-ft. (4.57 m) USB A-B cable to reach the desired distance. The U026-10M provides up to 150mA of power to the connected device. If your device requires more than 150mA of power, it will either need to have its own power supply; or, to be plugged into a powered USB 2.0 hub (such as U222-004-R) that is connected to the U026-10M.
