

WebSensor with PoE - remote temeperature, humidity, CO2 concentration with Ethernet interface

code: T6640

CO2 - carbon dioxide t-line Web sensor. Remote alarm.

Web Sensor with built-in temperature, humidity, ${\rm CO_2}$ sensor with PoE function.

A multiple point CO_2 and temperature adjustment procedure leads to excellent CO_2 measurement accuracy over the entire temperature working range; this is a must for process control and outdoor applications. The dual wavelength NDIR CO_2 sensing procedure compensates automatically for ageing effects. The CO_2 module is highly resistant to pollution and offers maintenance free operation and outstanding long term stability.

The CO_2 concentration is shown on the display or signaled by a color LED.
