

FAST CHIP 4.5' REMOVAL ALLOY & 10CC FLUX

Product Description

After two years of testing, we have developed a no-clean tacky flux that is lower in odor and tackier than anything else on the market! This flux will not run all over PCB when applied, making it ideal for rework solder and desoldering. When paired with our low melt Fast Chip Removal Alloy, you get the best possible performance for surface-mount rework.

WARNING: This product contains chemicals, including lead, known to the State of California to cause cancer, and birth defects or other reproductive harm. Wash hands after handling.

Key Features

- No Mess with easy to use Syringe with Tip
