

DESCRIPTION

The TBMA is a test board for the MagAlpha magnetic position sensor family. The TBMA allows users to run and test MagAlpha sensors quickly. TBMA boards come in two different formats: round (RD) and long (LT). In the RD format, the sensor is mounted in an end-of-shaft configuration. In the LT format, the sensor is mounted on the edge of the board and can be used in both side-shaft and end-of-shaft configurations.

TBMA test boards are compatible with the MACOM evaluation kit, offering seamless connection and operation of MagAlpha sensors, and allowing users to evaluate MagAlpha functionalities and performances with their own set-up.

The TBMA test board only includes the assembled board with the sensor and decoupling capacitors. It does not include connectors.

FEATURES

- Round Board Format for End-of-Shaft Mounting
- Long Board Format for Side Shaft and End-of-Shaft Mounting
- Compatible with the MagAlpha Communication Interface Kit (EVKT-MACOM)

APPLICATIONS

- Servo Drives
- Robotics
- Automotive
- BLDC Motor Commutation
- Encoders

All MPS parts are lead-free, halogen-free, and adhere to the RoHS directive. For MPS green status, please visit the MPS website under Quality Assurance. "MPS", the MPS logo, and "Simple, Easy Solutions" are registered trademarks of Monolithic Power Systems, Inc. or its subsidiaries.

OVERVIEW

Round (RD) Format

Long (LT) Format

Figure 1: TBMA Test Boards

Board Types

Different board types are available, and each has a different schematic and layout design (see Table 1 on page 3). The board type to use is determined by the selected sensor part number.

Each board type is also available in two different formats: a round test board (RD), or a long test board (LT). The board part number specifies which format is used:

- TBMAXXX-Q-**RD**-XXX = Round test board
- TBMAXXX-Q-**LT**-XXX = Long test board

Both RD and LT board formats can be used for end-of-shaft configurations where the sensor is positioned at the end of the motor or knob shaft. For side-shaft configurations where the sensor is positioned perpendicularly to the motor or knob shaft, only the RD board format can be used.

Table 1: Board Type

Board Type	Board Part Number	MPS Chip Part Number
Board type 1	TBMA100-Q-RD	MA100
	TBMA100-Q-LT	
	TBMA300-Q-RD	MA300
	TBMA300-Q-LT	
	TBMA700-Q-RD	MA700
	TBMA700-Q-LT	
	TBMA750-Q-RD	MA750
	TBMA750-Q-LT	
Board type 2	TBMA102-Q-RD	MA102
	TBMA102-Q-LT	
	TBMA302-Q-RD	MA302
	TBMA302-Q-LT	
	TBMA310-Q-RD	MA310

MAGNET SUPPLIERS

A selection of magnets are available with the MPS MAG10 magnet product family. This family offers three different magnet geometries: cylinder, ring, and half-cylinder. Figure 48 shows the available magnet geometries. The MPS MAG10 magnet product family can be purchased directly from MPS.

Figure 48: MPS MAG10 Magnet Geometries

Visit our website learn more about our magnet portfolio:

<https://www.monolithicpower.com/en/products/sensors/position-sensors/position-sensor-magnets.html>

If the magnet required for your application is not listed on our website, consider the following non-exhaustive list of possible magnet suppliers (see Table 12). The magnetization direction must be chosen wisely given that most sold magnets are often axially magnetized, which is not a magnetization direction typically required in magnetic angle-sensing applications. Angle-sensing applications typically use diametrically magnetized magnets.
