

## HXT14100

56Gbps – Single Channel PAM4 VCSEL Driver

The HXT14100 is a single channel, low power, Linear PAM4 VCSEL driver for SR optical applications that supports signaling rates up to 29GBuad PAM4. In conjunction with a VCSEL laser, the device handles the complete electrical-to-optical conversion. It includes CML input with equalization, linear multi-stage drivers, plus a digital interface to a driver control and supervision.

The HXT14100 integrates a number of functions like Automatic Power Control (APC), internal and module temperature monitoring and reporting. With RSSI input, the driver can directly synchronize with the input from a receiver.

HXT14100 is a direct DC-coupled die designed for a chip-on-board (COB) transmitter and in TOSA applications. It offers a cost-effective and compact solution.
