

H-putty2

Thermal Conductive Putty

LiPOLY H-putty2 is a one-part dispensable material with thermal conductivity 6.0W/m*K. High deformation can fill small air gaps perfectly to remove tolerance. It also can overcome overflow and drying problems to increase the thermal conductivity. H-putty2 is a great alternative to thermal grease and ideally suited for dispensing using the dispensing robot.

■ VERTICAL RELIABILITY

Using 3.0mm pad as a gap control, put the putty between the aluminum and the glass panel mark the initial position. Then, place it in the oven with 125°C for 1,000 hours and observe its displacement after reliability test

Material no dropped or changed after high temperature aging testing
