

MRC Series Thermoelectric Cooler Assembly

Note: This product is not recommended for new designs.

Please use the recommended replacement:

MFG Part Number: 385901-001

Description: NRC400-T0-00-PC1

The MRC150-DH2-HT-DV is a bench top re-circulating chiller that offers dependable, compact performance by controlling the temperature of a coolant in a liquid circuit. The coolant is re-circulated using a pump with high MTBF. Heat from coolant is absorbed by a heat exchanger and dissipated thru high density heat sinks equipped with brand name fans. The thermoelectric modules are custom designed to achieve long life operation. The unit is regulated with an easy to use digital temperature controller with push button interface. The controller can control temperature of liquid circuit at outlet from -12°C to 40°C. The unit is housed inside an a sheet metal casing, operates on universal input 115/230 VAC and is UL/IEC rated. Custom configurations are available, however, MOQ applies.

Features

- Compact design
- Precise temperature control
- Reliable solid-state operation
- Low noise
- RoHS-compliant

Applications

- Analytical Instrumentation
- Industrial Laser Cooling

MRC150-DH2-HT-DV Cooling Capacity (Qc)

MRC150-DH2-HT-DV ΔT (Inlet-Outlet) Fluid Temperature

MRC150-DH2-HT-DV - Pump Capacity

SPECIFICATIONS

Operating Environment Temperature Range

50/60 Hz
10%
250 mL
2.9 L/min
10.90 kg

NOTES

¹Use distilled water as coolant for control temperatures above 5°C

²To prevent freezing, use coolant with 70/30 distilled water/ethylene glycol

³Unit comes with a 115 VAC North American cord and a 230 VAC European cord

⁴UL Rating: UL61010 - 1/IEC61010-1
