

Quick Reference Guide

Compressive Board-to-Board Connectors

Compressive Board-to-Board (BTB) connectors are the low cost, high reliability and high design flexibility connectors, which are used to provide either power or signal connections between two printed circuit boards (PCBs) or one PCB and the other electrical modules. This product series is used to save cost and space in consumer electronic devices which continue to get smaller, thinner and less expensive. TE Connectivity's (TE) one-piece compressive BTB connector enables connections to a (locally) gold-plated secondary board by compression of the contacts. It is also scalable in a number of positions, height and pitch.

Key Features

- Provides both power and signal connections with a small form factor.
- Use as a connection for stacking applications between PCB and various solutions such as FPC, electrical modules, speakers and motors.
- Provides single row and dual row contact design for different applications.
- Various options for different working heights, pin counts and contact pitch.
- Up to 2.0 Amp current rating for certain P/N.
- Accommodates soldering and pick-and-place using standard equipment.

Applications

- Smart Phone
- Tablet PC
- Ultraportable computers
- Laptop PC
- Mobile Media Player
- Digital Camera
- Video Camera
- Navigation Systems
- Game Console

Key Features

Flat area on housing provides a flat surface for customer SMT assembly line nozzle pick-and-place.

Preloaded contact provides a reliable and stable electrical contact through the compression stroke.

Radius on the contact tips prevents hooking onto customer operator's glove.

Dimple on the contact ensures better electrical contact under all conditions.

Application

Product Offering

Notes:

MP: Mass production, SH: Shanghai (PRC), GD: Guangdong (PRC). All dimensions in [mm].

Frequently asked questions

1. What is the working height of TE's compressive BTB products?

TE offers 0.7mm to 3.15mm working heights.

2. What is the centerline spacing requirement?

TE offers the centerline space between 0.7mm to 2.0mm.

3. What are the pin counts of TE's compressive BTB products?

TE offers products ranging from 4 to 22 positions.

4. What is the major application of TE compressive BTB connectors?

This product series can be used in smartphones, tablets, ultraportable devices and laptops. PC MP3 & MP4 players, navigation systems and game consoles.

5. Does my application require a specific current rating?

In general the compressive BTB connectors are rated 1.5 amps maximum current rating; however, there are some exceptions. Please refer to the TE product specification for each part number to confirm.

6. Does my application need a minimum or maximum normal force?

Please refer to the notes in TE's customer drawing, as there are detailed descriptions regarding the contact normal force.
