

LV-OF-MSP-25-SS

Ruland LV-OF-MSP-25-SS, 25mm Mountable Two-Piece Shaft Collar with Clamping Lever, 303 SS Collar with Zinc Plated Lever, 45mm OD, 15mm Width

Description

Ruland LV-OF-MSP-25-SS is a two-piece mountable quick clamping shaft collar with clamping lever with a 25mm bore, 45mm OD, and 15mm width. It is made from OF-MSP-25-SS and LF45-CL-M6:18-ZS. LV-OF-MSP-25-SS has OD flats and tapped holes for mounting shaft collars to each other or adjacent components. The clamp style design does not mar the shaft, is easy to remove, and is indefinitely adjustable. The threaded stud on the lever is used in place of standard collar hardware. Two-piece shafts collars can be assembled in-lace without the need to remove other components. Ruland mates halves throughout the manufacturing process for proper fit, alignment, and holding power. When combined, the two parts create a shaft collar that requires no tools to install, remove, or reposition and is ideally suited for packaging, printing, and other applications where frequent setup changes and adjustments are needed. Once the lever is installed in the shaft collar, users simply turn the lever until they meet their desired torque. The adjustable lever can be reposition by the user without the loss of holding power by lifting the handle and twisting it 40° to lock it in a new position. This allows for use in space constrained environments where 360° rotation is not possible to fully seat the lever. OF-MSP-25-SS is made from 303 stainless steel. LF45-CL-M6:18-ZS has a zinc plated steel handle and stainless steel threaded stud. This material combination allows for a durable quick clamping and release component with high corrosion resistance that is suitable for most industrial applications. The lever is black to seamlessly integrate with the aesthetics of most equipment. OF-MSP-25-SS is manufactured by Otto Ganter. LV-OF-MSP-25-SS is RoHS3 and REACH compliant.
