

Large Long Plastic Snap Rivets – 13mm to 16mm – 10 pack

PRODUCT ID: 3946

Enter the world of cardboard construction and build playful robot friends!

Instead of slapping on tape or waiting for your hot glue to warm up, you can use these Plastic Snap Rivets! So easy to install. Just poke them through the cardboard and fasten with the back piece. This will ensure clean, movable joints and attachments. You can even remove them with some effort (but they'll hold as long as you don't pry them apart)

Unlike our previous pop rivet packs (say that five times fast!), these are constructed with a larger, wider head (approx 19mm) AND longer tails (approx 14mm), allowing you to craft with thicker cardboard.

Works best with 2 ply cardboard, cardstock or other paper products that are about 2mm thick. You can connect two pieces together with one rivet and they'll rotate. Two rivets can be used if you want them to stay still.

Grab some cardboard and get making!

TECHNICAL DETAILS

Single rivet: 18.8 x 18.8 x 14.2mm
