

| SPECIFICATIONS |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: |
| Model | Stroke mm | Max Absorption Energy J(kgf•m) |  | Max Equivalent Mass kg (kgf) |
| FK-2725L-C | 25 | 79(8.1) |  | 420(420) |
| Max Drag N (kgf) | Max. Absorption Energy per min. $\mathrm{J} / \mathrm{min}(\mathrm{kgf} \cdot \mathrm{m} / \mathrm{min}$ ) |  | Extension Force N(kgf) | $\begin{gathered} \text { Mass } \\ \mathbf{g} \end{gathered}$ |
| $\begin{array}{r} 539 \\ (55) \end{array}$ | 6,370(650) |  | $\begin{gathered} 27.3(2.78) \\ \text { or lower } \end{gathered}$ | 385 |

## COMMON SPECIFICATIONS

| Range of Impact Rate | $\mathrm{m} / \mathrm{s}$ | $0.3^{\sim} 1$ |
| :--- | :---: | :---: |
| Maximum Cycle Rate | $\mathrm{cycle} / \mathrm{min}$ | 60 |
| Operating Temperature | $\mathrm{C}^{\circ}$ | $-5 \sim 70$ |

## CHARACTERISTICS

- With a fixed, specially-designed orifice structure, an optimal impact absorption can be achieved even under variable operating conditions.
- The main unit can also be used as a stopper. (No external stopper required, except for FK-3625A)
- Three different types are available to accommodate various speeds. For low-speed: L, for medium-speed: M, for highspeed: H .
- Two or more of each product can be used in parallel.
- This product can also be custom-designed for optimal impact absorption.

## PRECAUTIONS FOR USE

- Do not use this product without carefully reading the attached owner's manual.
- Do not turn the oil inlet screw located at the bottom of the main unit.
- Ensure that sufficient mounting strength is secured for this product.
(As a guideline, it should be 2 to 3 times the maximum drag listed in the catalogue.)
- Do not use this product in a vacuum or a location where it may come in contact with oil.
- Ensure that an eccentric load is not applied to the soft absorber. (Allowable eccentric angle: $\pm 2.5^{\circ}$ )
- Ensure that an external stopper (OP-020**) is also used. (The FK-0404 series can be used without a stopper.)

## OPTIONAL PARTS

## Eccentric angle adaptor OP-010FB

- When attaching the eccentric angle adaptor, screw it into the main unit until the cap for eccentric angle and the piston rod form a tight connection. While maintaining this position, fasten the main unit's nut until secured.
* If the eccentric angle adaptor is secured without establishing a tight fit, a sufficient stroke cannot be obtained. Furthermore, if the eccentric angle adaptor is further screwed in, after it has formed a tight connection, and then secured in place, the cap for eccentric angle cannot be pushed all the way to the stroke end.
- The inclined adapter is not available for models with soft absorber cap (-C) and urethane cap (-R)

## Stopper nut OP-020FB

- Adjust so that it stops 1 mm before the stroke end, and fasten with the main unit's nut until secured.

OP-020FB-S
(without cap)

Mass 90g

$$
\begin{aligned}
& \text { OP-020FB-C } \\
& \text { (with cap) }
\end{aligned}
$$

Mass 137g
Note: When attaching, make sure that the side without a bearing chamfer is the impact surface.

Standard nuts are
sold separately as well - M27 Nut

## Flange OP-040FB

- This is a mounting fixture for soft absorbers

Mass 157g

## Liquid-proof cap FK-2725L-C-060

- The main unit is supplied in assembly
- Ideal for use in environments where oil splatter poses a problem.
- Ensure that the cap is facing upward. If the cap is facing sideways or downward, it cannot provide an effective means for liquid proofing.

Mass 112g

Note: Liquid-proof caps are not sold separately

## Holder with a switch OP-032FB

Position the holder in such a way that the tip of the switch and one of the ends of the metal ring for the rod cap are separated more than 0.5 mm . Cause of malfunction.

Mass 107g
