Ruland Sensor Bracket Clamp Connector, Thru Hole 16mm, Thread M6, L 40mm, Aluminum

Description

Ruland MT16-CSBC-M6-A is a cross pattern sensor bracket clamp connector that attaches to a 16mm round tube and has an M6 center tapped hole, M4 tapped holes in the cross, a 20mm width and height, and a 40mm overall length. It is designed to fit on Ruland tubes and flange bolt bases that begin with MT16. MT16-CSBC-M6-A is aluminum and screws are 304 stainless steel for use in most industrial applications. This bracket clamp is used to support brackets for mounting sensors, screens, reflectors, plexiglass machine guards, and other industrial components. It has a cross pattern allowing the user to mount with a single M6 screw through the center of the bracket or with multiple M4 screws in the arms of the cross. The use of a cross pattern prevents the bracket from rotating if the mounted component has high mass or will have force applied to it such as a screen. An MT15:16:20-ALK-M6-25adjustable clamping handle can be used to rapidly reposition MT16-CSBC-M6-A or the tube it is attached to without the use of tools. MT16-CSBC-M6-A is manufactured by Otto Ganter, inventoried by Ruland, and RoHS3 compliant.
