

## LA92-1/2X13:63-ZS

Ruland Adjustable Clamping Lever, Lever Length 92mm, Stud Thread 1/2X13, Stud Length 63mm, Zinc Lever, Stainless Steel Inserts

## **Description**

Ruland LA92-1/2X13:63-ZS is an adjustable clamping handle with a 92mm handle, 1/2X13 threaded stud, 63mm stud length, 19mm insert diameter, and 65mm overall height. The stainless steel inserts combined with a zinc die-cast handle allow for use in corrisve applications where durability is required. LA92-1/2X13:63-ZS has a textured finish on the handle making it easy for the user to grip in environments with water, coolant, chemicals, or other liquids. It is commonly found in packaging, printing, food processing, and manufacturing systems where conveyor rails, sensors, screens, and other components require frequent adjustments without the use of tools. The adjustable feature of this handle allows it to be used in confined spaces with limited hand access or where 360 degree rotation is not possible. Serrations connect the insert to the handle for easy disengagement. The user pulls the handle upwards by hand to disengage the serrations allowing it to be swiveled to the desired clamping position. Serrations automatically re-engage once the user releases the handle locking it in-place. A 1/2X13 threaded stud can replace existing hardware in an application or mate to an equivalently sized tapped hole for a quick installation. LA92-1/2X13:63-ZS is black to seamlessly integrate with the aesthetics of most equipment. It is manufactured by Otto Ganter, stocked by Ruland, and RoHS3 and REACH compliant.

**Product Specifications** 

1/2 in - 13 TPI	Stud Length LS	63 mm
