

PFH05W Evaluation Board Instruction Manual for PFH500F AC-DC Power Modules

BEFORE USING THE POWER SUPPLY UNIT

Be sure to read and understand this instruction manual thoroughly before using this product. Pay attention to all cautions and warnings before using this product. Incorrect usage could lead to an electrical shock, damage to the unit or a fire hazard.

DANGER

Never use this product in locations where flammable gas or ignitable substances are present. There are potential risks of igniting these substances caused by arcing.

WARNING

- Do not touch this product or its internal components while circuit is live, or shortly after shut down. There may be high voltage or high temperature present and you may receive an electric shock or burn.
- While this product is operating, keep your hands and face away from it as you may be injured by an unexpected situation.
- Do not make unauthorized changes to this product, otherwise you may receive an electric shock. It will also void the product warranty.
- Do not drop or insert anything into the product. It might lead to a failure, fire or electric shock.
- Do not use this product if abnormal conditions such as emission of smoke and/or abnormal smell, etc... are present. It might lead to fire and/or electric shock. In such cases, please contact TDK-Lambda. Do not attempt to repair by yourself, as it is dangerous for the user.
- Do not operate these products in the presence of condensation. It might lead to fire or electric shock.

CAUTION

- This power supply is designed and manufactured for use within an end product such that it is accessible only to trained SERVICE ENGINEERS.
- Confirm that the connections to input/output terminals, and signal terminals are correct as specified in this instruction manual before turning on the power.
- Input voltage, Output current, Output power, ambient temperature, case temperature, and ambient humidity should be kept within the specifications, otherwise the product may be damaged.
- Do not operate or store this product in an environment where condensation can occur. Waterproof treatment or special storage and handling is necessary.
- The equipment has been evaluated for use in a Pollution Degree 2 environment.
- Do not use this product in environment with a strong electromagnetic field, corrosive gas or conductive substances.
- For applications, which require very high reliability, such as nuclear related equipment, medical equipment, traffic control equipment, etc., it is necessary to provide a fail-safe mechanism in the end equipment.
- Do not inject abnormal voltages into the output terminals or signal terminals of this product. The injection of reverse voltage or over voltage exceeding nominal output voltage into these terminals can damage the internal components of the product.
- Never operate the product under over-current or short circuit conditions. Failure or other damage may occur.
- The output voltage of this power supply unit is considered to be a hazardous energy level (The voltage is 2V or more and the electric power is 240W or more). It must not be made accessible to users. Protection must be provided for Service Engineers against indirect contact with the output terminals and/or to prevent tools being dropped across them. While working on this product, the AC input power must be switched off, and the input, output, +VBus, and -VBus terminal voltages should be at a safe level.
- The application circuits and their parameters are for reference only. Be sure to verify effectiveness of these circuits and their parameters before finalizing the circuit design.
- Use a Fast-Blow external fuse to each module to ensure safe operation and compliance with the safety standards to which it is approved. The recommended input fuse rating within the instructions is as follows: 10A, 250V fast acting fuse. The breaking capacity and voltage rating of this fuse may be subject to the end use application.

⚠ CAUTION

- This information in this document is subject to change without prior notice. Please refer to the latest version of the data sheet, etc., for the most up-to date specifications of the product.
- No part of this document may be copied or reproduced in any form without prior written consent TDK-Lambda.

PFH Evaluation Kit with PFH05W Evaluation Test Board

Reference Documents:

1.0 Ordering Information

Series	Rated Output Voltage		Option Code		Evaluation Kit		# of Modules
PFH05W	##	-	1*0	-	EVK	-	S1
	12V 28V 48V		100 – Non Droop 1D0 – Droop Mode for Current Share				Single

1.1 Evaluation Kit Description

Evaluation Kit Part Number	PFH500F Module Installed	Rated Input	Rated Output Voltage (Vdc)	Rated Output Current (A)	Droop Mode **
PFH05W12-100-EVK-S1	PFH500F-12-100-R	85-265 Vac 50/60 Hz	12	42.0	No
PFH05W12-1D0-EVK-S1	PFH500F-12-1D0-R		12	42.0	Yes
PFH05W28-100-EVK-S1	PFH500F-28-100-R		28	18.0	No
PFH05W28-1D0-EVK-S1	PFH500F-28-1D0-R		28	18.0	Yes
PFH05W48-100-EVK-S1	PFH500F-48-100-R		48	10.5	No
PFH05W48-1D0-EVK-S1	PFH500F-48-1D0-R		48	10.5	Yes

* Consult sales for Evaluation Kits that offer 400Hz input line frequency operation.

** For simplified paralleling to support higher power or redundant applications, use Droop Mode.

2.0 Getting Started

PFH05W##-100-EVK-S1 & PFH05W##-1D0-EVK-S1 Evaluation Boards

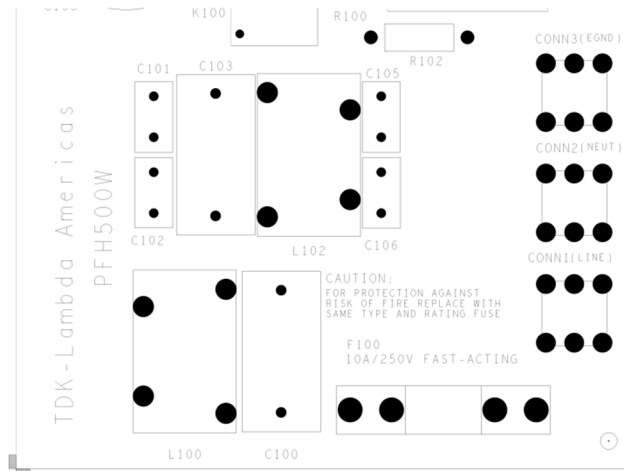

NOTE: ## - Denotes output voltage of PFH modules (e.g. “28” for 28Vdc)

2.1 Test Equipment

- 1.) **AC Voltage Source:** Capable of single-phase output, AC voltage range $85 V_{AC} - 265 V_{AC}$, 47 Hz - 63 Hz, adjustable. AC Source should be adequately sized to support the PFH module's operation.
- 2.) **DC Multimeter:** Capable of 0V to 500V input range.
- 3.) **Output Load:** DC load capable of $60 V_{DC}$ or greater, DC Load current up to 42A or greater (12V/42A, 28V/18A, or 48V/10.5A), and 500 W or greater, with display such as load current and load power.
- 4.) **Fan:** Some airflow is required to be directed across the mounted heatsink of the PFH module.

2.2 Test Setup

- 1.) Electrical Input Connections:
- | | |
|---------------|--|
| CONN1: | LINE , Input Line Connection |
| CONN2: | NEUT , Input Neutral Connection |
| CONN3: | EGND , Earth Ground Connection |

NOTE: Refer to the PFH Datasheet for specific module’s AC Input Current requirement when sizing wire gauge and cable length.

- 2.) Electrical Output Connection:
- | | |
|--------------|--|
| CONN5 | +Vout , Output Load Connections
(Red Cable) |
| CONN4 | -Vout , Output Load Return Connections
(Black Cable) |

⚠ WARNING

Make sure ALL input and output cables are de-energized before making electrical connections to the Evaluation Test Board

AC INPUT CONNECTOR

DC OUTPUT CONNECTOR

2.3 Test Points

- | | | |
|----------------------------|-------|---|
| 1.) Secondary Test Points: | TP201 | Vout+ , Monitor Output Voltage |
| | TP204 | Vout(-) , Monitor Output Voltage return |
| | TP202 | RS(+) , Output Remote Sense (+) connection |
| | TP203 | TRIM , Trim Test connection |

⚠ WARNING HAZARDOUS VOLTAGE

- | | | |
|--------------------------|-------|-------------------------------------|
| 2.) Primary Test Points: | TP103 | +BUS , Monitor 400Vdc |
| | TP104 | -BUS , Monitor 400Vdc return |

- | | |
|-------|--|
| TP101 | LINE , Monitor AC Line Input |
| TP102 | NEUT , Monitor AC Neutral Input |

2.4 PMBus and Remote On/Off Functions

1.) PMBus Connections (J301)

Pin #:	Description:
1	Not Used
2	Not Used
3	Not Used
4	Not Used
5	USB 3.3Vdc ¹
6	SGND
7	Not Used
8	PMBus Alert
9	PMBus Clock
10	PMBus Data

NOTE:

1. 3.3Vdc is supplies by the interface module

To communicate with the PFH module via PMBus, use the Texas Instruments Interface Adapter EVM (P/N#: USB-TO-GPIO). This adapter is available through normal distribution channels.

⚠ WARNING When AC voltage is applied to the Evaluation Test Board the 450V bulk capacitors ARE energized at ALL time

- | | | | | | |
|-------------------------------|---|-------|---------------------------|-------|---------------------------|
| 2.) Remote On/Off (SW200) | SW200 , Will either turn the module On or put it into Standby | | | | |
| 3.) Auxiliary Voltage (DS301) | DS301 , The LED will Turn-On when the 450Vdc bulk capacitors are energized above 70Vdc | | | | |
| 4.) Power Good (DS300) | DS300 , The LED will Turn-On once the module's output has been Turned-On | | | | |
| 5.) Test Points | <table border="0" style="margin-left: 20px;"> <tr> <td style="padding-right: 20px;">TP301</td> <td>Monitor Auxiliary Voltage</td> </tr> <tr> <td>TP302</td> <td>Monitor Power Good Signal</td> </tr> </table> | TP301 | Monitor Auxiliary Voltage | TP302 | Monitor Power Good Signal |
| TP301 | Monitor Auxiliary Voltage | | | | |
| TP302 | Monitor Power Good Signal | | | | |

2.5 Setting the PMBus Address

- The PMBus address setting on the Evaluation Test Board comes with the Factory default setting, Address: 0x19 (Hex) (R318 is not populated & R319 is populated with 1.00K)

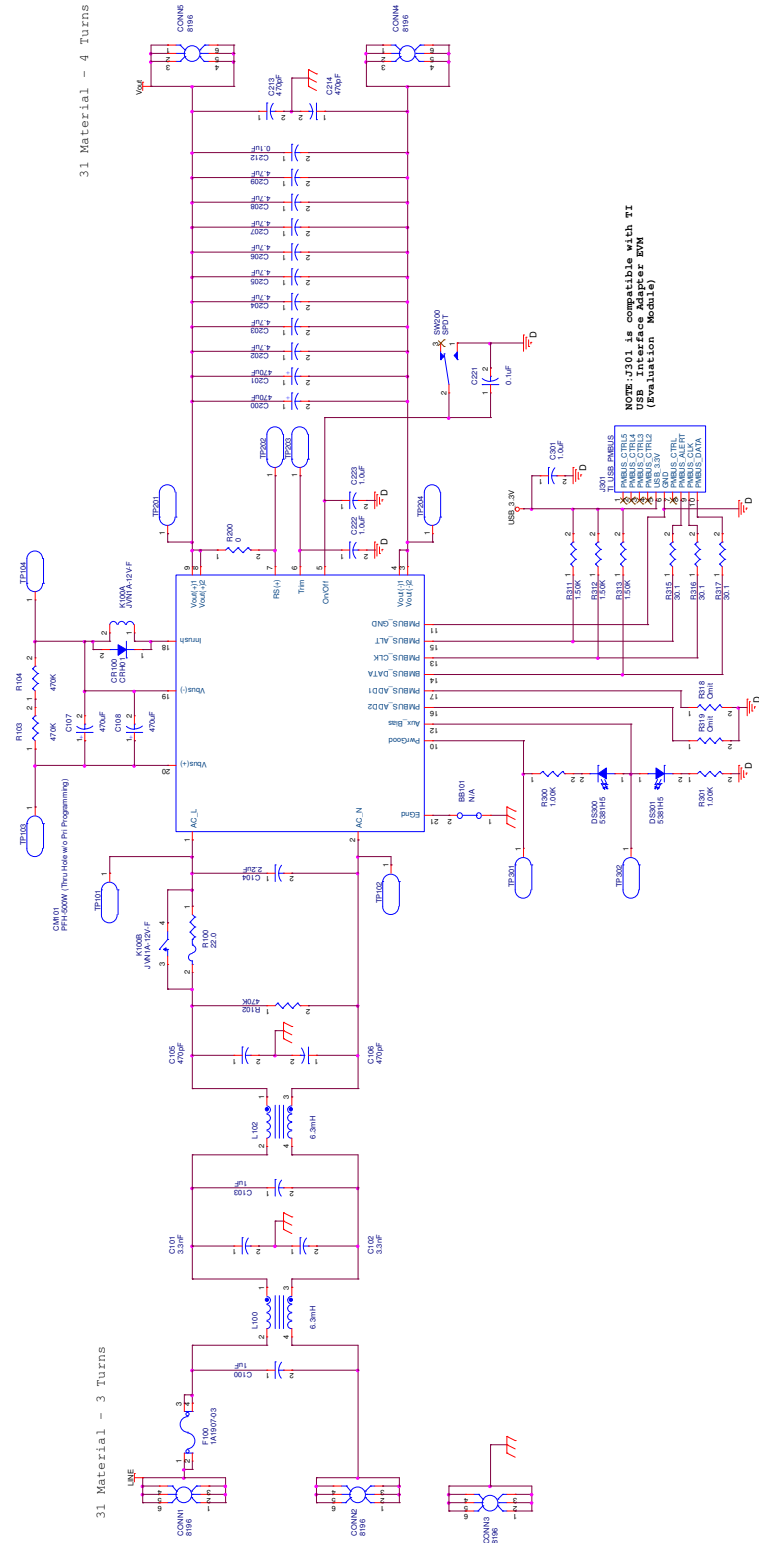

2.6 Turning PFH Module On/Off

- 1.) Before applying AC voltage to the module make sure,
 - a. The surface under the test fixture is a non-conductive surface
 - b. Securely connect Input and Output cables to the test board
 - c. Securely connect all monitoring devices to test board

⚠ WARNING When AC voltage is applied to the Evaluation Test Board the 450V bulk capacitors ARE energized at ALL time

- 2.) Apply AC input voltage to test fixture
 - a. AC input voltage range 100Vac – 265Vac
 - b. AC input voltage range < 100Vac, output load is de-rated 6.7W/V
 - c. Once AC input voltage is applied, Auxiliary Voltage LED (DS301) will Turn-On
- 3.) Turning On PFH module can be accomplished 1 of 2 ways,
 - i. Remote On/Off
 - ii. PMBus
 - a. The method chosen to turn On PFH has to be the **SAME** method to turn Off PFH
 - i. Example: If Remote On/Off turns On PFH, then PMBus cannot turn it Off, only Remote On/Off can turn Off PFH.
 - b. Method 1: Toggle Remote On/Off,
 - I. Remote On/Off switch (SW200) On – Will turn PFH On
 - II. Remote On/Off switch (SW200) Off – Will turn PFH Off.
 - c. Method 2: PMBus,
 - I. Write CMD 0x01, Byte 0x80 – Turns PFH On
 - II. Write CMD 0x01, Byte 0x00 – Turn PFH Off
 - d. Once PFH is turned On, Power Good LED (DS300) will turn On
 - e. When PFH is turned Off, Power Good LED (DS300) will turn Off
