"Coined" edges prevent cable damage

- Heyco's SunRunner and SunRunner EZ's robust "double-compression" design securely holds from (1) 12 gauge USE-2 to (2) 10 gauge PV-1000V solar wires.

- Also for use with other cables from .20˝ (5,1 mm) to .33˝ (8,3 mm) in diameter.

- Heyco SunRunner Clips are designed to provide a better method for PV module wire management **and may be used wherever single or multiple cable management is needed**.

- Smooth clip edges prevent damage to cable insulation.

- Locking tabs securely fasten clips to module extrusions, **or other panels**.

- Screwdriver slot for easy removal or movement of clips if necessary.

- Neatly dresses cables on PV panel frames or along mounting channels.

- Constructed from corrosion resistant 304 stainless steel, not for use in a marine salt water environment.

- 316 stainless steel now available for marine and other harsh environments.

- **SunRunner Vidrio™ is designed to mount directly onto the glass panel with compression force only.** Will not harm the glass surface, and the black color meets many HOA requirements!

- The TPE coating on the SunRunner Vidrio™ provides an electrically insulated surface.

- **SunRunner EZ's are designed for thicker module frames** as well as racking – accommodates profiles up to .250˝ (6,4 mm) thick!

- **SunRunner 4 designed to hold up to (4) 12 gauge USE-2 or (4) 10 gauge PV-1000V solar wires**.

- SunRunner 4 is constructed from heat treated 410 stainless steel for excellent strength and corrosion protection for outdoor exposure.
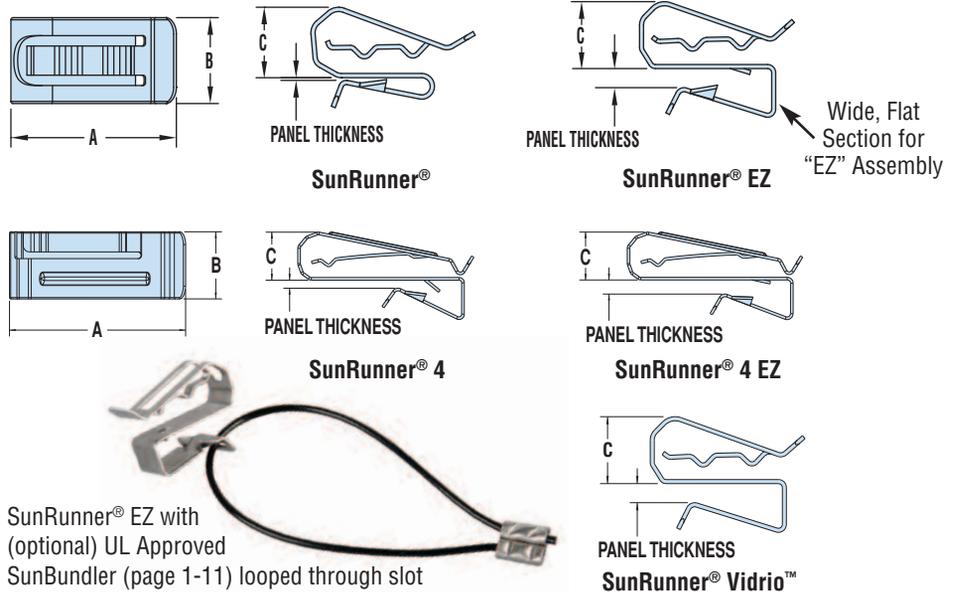

- DFARS Compliant.

HEYClip™ SunRunner® Cable Clips
Double-Compression, Straight-thru Design
