

## FCR20-15MM-3/8"-SS

Ruland FCR20-15MM-3/8"-SS, 15mm x 3/8" Six Beam Coupling, Stainless Steel, Clamp Style, 1.250" (31.8mm) OD, 1.750" (44.5mm) Length

## Description

Ruland FCR20-15MM-3/8"-SS is a clamp style six beam coupling with 15mm x 0.3750" bores, 1.250" (31.8mm) OD, and 1.750" (44.5mm) length. It is machined from a single piece of material and features two sets of three spiral cuts. This gives it higher torque capacity, lower windup, and larger body sizes than single or four beam couplings and allows for use in light duty power transmission applications such as coupling a servo motor to a lead screw. FCR20-15MM-3/8"-SS is zero-backlash and has a balanced design for reduced vibration at high speeds of up to 6,000 RPM. Ruland supplies this spiral coupling with Nypatch® anti-vibration hardware that allows for even seating of the screw, repeated screw installations, prevents galling, and maintains high holding power. All hardware is metric and tests beyond DIN 912 12.9 standards for maximum torque capabilities. FCR20-15MM-3/8"-SS is made from 303 stainless steel for increased torque capacity. It is machined from bar stock that is sourced exclusively from North American mills and RoHS3 and REACH compliant. FCR20-15MM-3/8"-SS is manufactured in our Marlborough, MA factory under strict controls using proprietary processes.

## **Product Specifications**

Product Specifications			
Bore (B1)	15 mm	Small Bore (B2)	0.3750 in
B1 Max Shaft Penetration	0.842 in (21.4 mm)	B2 Max Shaft Penetration	0.842 in (21.4 mm)
Outer Diameter (OD)	1.250 in (31.8 mm)	Bore Tolerance	+0.001 in / -0.000 in (+0.025 mm /
			-0.000 mm)
Length (L)	1.750 in (44.5 mm)	Clearance Diameter (C) MAX	1.459 in (37.06 mm)
Recommended Shaft Tolerance	+0.0000 / -0.0005 " (+0.000 / -0.013 mm)	Cap Screw	M5
Screw Material	Alloy Steel with Nypatch®	Hex Wrench Size	4.0 mm
Screw Finish	Black Oxide	Seating Torque	9.5 Nm
Number of Screws	2 ea	Dynamic Torque Reversing	25 lb-in (2.83 Nm)
Angular Misalignment	3°	Dynamic Torque Non-Reversing	50.1 lb-in (5.66 Nm)
Parallel Misalignment	0.015 in (0.38 mm)	Static Torque	100.2 lb-in (11.32 Nm)
Axial Motion	0.010 in (0.25 mm)	Torsional Stiffness	0.037 Deg/lb-in (0.33 Deg/Nm)
Moment of Inertia	0.1094 lb-in <sup>2</sup> , 32.426 x10 <sup>-6</sup> kg-m <sup>2</sup>	Maximum Speed	6,000 RPM
Full Bearing Support Required?	Yes	Nypatch® Anti-Vibration Hardware?	Yes
Zero-Backlash?	Yes	Balanced Design	Yes
Torque Wrench	TW:BT-4C-3/8-86	Recommended Hex Key	Metric Hex Keys
Material Specification	Type 303 Austenitic, Non-Magnetic Bar	Temperature	-40°F to 350°F (-40°C to 176°C)
Finish Specification	Bright, No Plating	Manufacturer	Ruland Manufacturing
Country of Origin	USA	Weight (lbs)	0.416500
UPC	634529193167	Tariff Code	8483.60.8000
UNSPC	31163003

Installation Instructions			
	<ol> <li>Align the bores of the FCR20-15MM-3/8"-SS six beam coupling on the shafts that are to be joined and determine if the misalignment parameters are within the limits of the coupling. (<i>Angular</i> <i>Misialignment:</i> 3°, <i>Parallel Misalignment:</i> 0.015 in (0.38 mm), <i>Axial Motion:</i> 0.010 in (0.25 mm))</li> <li>Fully tighten the M5 screw on one hub to the recommended seating torque of 9.5 Nm using a 4.0 mm hex torque wrench.</li> <li>Before tightening the screws on the second hub, rotate the coupling by hand to allow it to reach its free length.</li> </ol>		
	<ol> <li>Tighten the screws on the second hub to the recommended seating torque. Make sure the coupling remains axially relaxed and the misalignment angle remains centered along the length of the coupling.</li> </ol>		
	5. The shafts may extend into the relieved portion of the bore as long as it does not exceed the shaft penetration length of 0.842 in (21.4 mm).
