1. PRODUCT DESCRIPTION

GTM2718AB381XPV0 is a miniature, very high-performance, low power consumption, differential input silicon microphone with analog output and bottom-port for sound input. It is a cost-effective alternative to traditional electret condenser microphone (ECM). Provided on tap-and-reel, it is ideally suited for high volume applications. And it can be attached directly to customer’s PCB using standard automatic pick-and-place equipment and surface-mounted via standard solder reflow equipment.

GTM2718AB381XPV0 is specifically designed for Active Noise Cancellation in TWS earphones that require very high SNR and AOP bottom-port sound inlet silicon microphones, although it can be used for other applications.

2. APPLICATIONS:

- 1). Active Noise Cancellation in TWS earphones
- 2). Smart electronic devices
- 3). Headphone and headset accessories
