

## MT20-SROD-200-SS, With Scale

Ruland Hollow Round Tube With Scale, OD 20mm, ID 16mm, L 200mm, Stainless Steel

## Description

Ruland MT20-SROD-200-SS is a solid round tube with scale with a 20mm outside diameter, 16mm inside diameter, and 200mm overall length. It is designed to fit with Ruland clamp connectors, swivel components, and mounting bases that begin with MT20. MT20-SROD-200-SS is made of 304 stainless steel for high corrosion resistance. It is used to support components for mounting sensors, screens, reflectors, plexiglass machine guards, and other industrial components. Major increments are 10mm and minor increments 1mm giving the user a high degree of adjustment precision. When the system combines this tube with a clamp or swivel connector with adjustable clamping handle, the user can make fine rapid adjustments for improved efficiency and accuracy. MT20-SROD-200-SS is hollow for reduced weight and to help protect wires from components such as cords and screens from being damaged. When combined with MT20-RTUBECAP-P tube caps the user can drill in the tube cap to reduce cords exposure to the operating environment for safety. It is precision ground to help reduce surface imperfections. MT20-SROD-200-SS is manufactured by Otto Ganter, inventoried by Ruland, and RoHS3 compliant.
