## SIEMENS

## Data sheet

## US2:22GP32FH81

Reversing motor starter, Size 2 1/2, Three phase full voltage, Amb. compensate bimetal OLR, Contactor amp rating 60A, Non-combination type, Enclosure type 4X fiberglass, Water/dust tight noncorrosive

F	gui	resir	niiar		

product brand name	Class 14 & 22				
design of the product	Full-voltage reversing motor starter				
special product feature	Half-size starter				
General technical data					
weight [lb]	18.5 lb				
Height x Width x Depth [in]	24 × 15 × 7 in				
touch protection against electrical shock	NA for enclosed products				
installation altitude [ft] at height above sea level maximum	6560 ft				
ambient temperature [°F]					
during storage	-22 +149 °F				
<ul> <li>during operation</li> </ul>	-4 +104 °F				
ambient temperature					
during storage	-30 +65 °C				
<ul> <li>during operation</li> </ul>	-20 +40 °C				
country of origin	USA				
Horsepower ratings					
yielded mechanical performance [hp] for 3-phase AC motor					
• at 200/208 V rated value	15 hp				
• at 220/230 V rated value	20 hp				
• at 460/480 V rated value	30 hp				
• at 575/600 V rated value	30 hp				
Contactor					
size of contactor	Controller half size 2 1/2				
number of NO contacts for main contacts	3				
operating voltage for main current circuit at AC at 60 Hz maximum	600 V				
operational current at AC at 600 V rated value	60 A				
mechanical service life (switching cycles) of the main contacts typical	1000000				
Auxiliary contact					
number of NC contacts at contactor for auxiliary contacts	0				
number of NO contacts at contactor for auxiliary contacts	1				
number of total auxiliary contacts maximum	7				
contact rating of auxiliary contacts of contactor according to UL	10A@600VAC (A600), 5A@600VDC (P600)				
Coil					
type of voltage of the control supply voltage	AC				
control supply voltage					

	000 44014		
• at AC at 50 Hz rated value	380 440 V		
at AC at 60 Hz rated value	440 480 V		
holding power at AC minimum	8.6 W		
apparent pick-up power of magnet coil at AC	218 VA		
apparent holding power of magnet coil at AC	25 VA		
operating range factor control supply voltage rated value of magnet coil	0.85 1.1		
percental drop-out voltage of magnet coil related to the input voltage	50 %		
ON-delay time	19 29 ms		
OFF-delay time	10 24 ms		
Overload relay			
product function			
overload protection	Yes		
• test function	Yes		
external reset	Yes		
reset function	Manual and automatic		
adjustment range of thermal overload trip unit	0.85 1.15		
number of NC contacts of auxiliary contacts of overload relay	1		
number of NO contacts of auxiliary contacts of overload relay	0		
operational current of auxiliary contacts of overload relay			
• at AC at 600 V	10 A		
● at DC at 250 V	5 A		
contact rating of auxiliary contacts of overload relay according to UL	10A@600VAC (A600), 5A@250VDC (P300)		
Enclosure			
degree of protection NEMA rating	4X, fiber glass		
design of the housing	dustproof, waterproof & resistant to corrosion		
Mounting/wiring			
Mounting/wiring	Vertical		
mounting position	Vertical Surface mounting and installation		
mounting position fastening method	Surface mounting and installation		
mounting position fastening method type of electrical connection for supply voltage line-side	Surface mounting and installation Box lug		
mounting position fastening method type of electrical connection for supply voltage line-side tightening torque [lbf·in] for supply temperature of the conductor for supply maximum	Surface mounting and installation		
mounting position fastening method type of electrical connection for supply voltage line-side tightening torque [lbf·in] for supply temperature of the conductor for supply maximum permissible	Surface mounting and installation Box lug 45 45 lbf·in 75 °C		
mounting position         fastening method         type of electrical connection for supply voltage line-side         tightening torque [lbf·in] for supply         temperature of the conductor for supply maximum         permissible         material of the conductor for supply	Surface mounting and installation Box lug 45 45 lbf·in 75 °C AL or CU		
mounting position         fastening method         type of electrical connection for supply voltage line-side         tightening torque [lbf·in] for supply         temperature of the conductor for supply maximum         permissible         material of the conductor for supply         type of electrical connection for load-side outgoing feeder	Surface mounting and installation Box lug 45 45 lbf-in 75 °C AL or CU Screw-type terminals		
mounting position         fastening method         type of electrical connection for supply voltage line-side         tightening torque [lbf·in] for supply         temperature of the conductor for supply maximum         permissible         material of the conductor for supply         type of electrical connection for load-side outgoing feeder         tightening torque [lbf·in] for load-side outgoing feeder	Surface mounting and installation Box lug 45 45 lbf-in 75 °C AL or CU Screw-type terminals 35 50 lbf-in		
mounting position         fastening method         type of electrical connection for supply voltage line-side         tightening torque [lbf·in] for supply         temperature of the conductor for supply maximum         permissible         material of the conductor for supply         type of electrical connection for load-side outgoing feeder         tightening torque [lbf·in] for load-side outgoing feeder         type of electrical connection of magnet coil	Surface mounting and installation Box lug 45 45 lbf-in 75 °C AL or CU Screw-type terminals 35 50 lbf-in Screw-type terminals		
mounting position         fastening method         type of electrical connection for supply voltage line-side         tightening torque [lbf·in] for supply         temperature of the conductor for supply maximum         permissible         material of the conductor for supply         type of electrical connection for load-side outgoing feeder         tightening torque [lbf·in] for load-side outgoing feeder         type of electrical connection of magnet coil         tightening torque [lbf·in] at magnet coil	Surface mounting and installation Box lug 45 45 lbf-in 75 °C AL or CU Screw-type terminals 35 50 lbf-in Screw-type terminals 5 12 lbf-in		
mounting position         fastening method         type of electrical connection for supply voltage line-side         tightening torque [lbf·in] for supply         temperature of the conductor for supply maximum         permissible         material of the conductor for supply         type of electrical connection for load-side outgoing feeder         tightening torque [lbf·in] for load-side outgoing feeder         type of electrical connection of magnet coil         tightening torque [lbf·in] at magnet coil         type of connectable conductor cross-sections of magnet         coil at AWG cables single or multi-stranded	Surface mounting and installation Box lug 45 45 lbf-in 75 °C AL or CU Screw-type terminals 35 50 lbf-in Screw-type terminals 5 12 lbf-in 2x (16 12 AWG)		
mounting position         fastening method         type of electrical connection for supply voltage line-side         tightening torque [lbf·in] for supply         temperature of the conductor for supply maximum         permissible         material of the conductor for supply         type of electrical connection for load-side outgoing feeder         tightening torque [lbf·in] for load-side outgoing feeder         type of electrical connection of magnet coil         tightening torque [lbf·in] at magnet coil         type of connectable conductor cross-sections of magnet         coil at AWG cables single or multi-stranded         temperature of the conductor at magnet coil maximum         permissible	Surface mounting and installation Box lug 45 45 lbf-in 75 °C AL or CU Screw-type terminals 35 50 lbf-in Screw-type terminals 5 12 lbf-in 2x (16 12 AWG) 75 °C		
mounting position         fastening method         type of electrical connection for supply voltage line-side         tightening torque [lbf·in] for supply         temperature of the conductor for supply maximum         permissible         material of the conductor for supply         type of electrical connection for load-side outgoing feeder         tightening torque [lbf·in] for load-side outgoing feeder         type of electrical connection of magnet coil         tightening torque [lbf·in] at magnet coil         type of connectable conductor cross-sections of magnet         coil at AWG cables single or multi-stranded         temperature of the conductor at magnet coil         material of the conductor at magnet coil	Surface mounting and installation Box lug 45 45 lbf-in 75 °C AL or CU Screw-type terminals 35 50 lbf-in Screw-type terminals 5 12 lbf-in 2x (16 12 AWG) 75 °C CU		
mounting position         fastening method         type of electrical connection for supply voltage line-side         tightening torque [lbf·in] for supply         temperature of the conductor for supply maximum         permissible         material of the conductor for supply         type of electrical connection for load-side outgoing feeder         tightening torque [lbf·in] for load-side outgoing feeder         tightening torque [lbf·in] at magnet coil         tightening torque [lbf·in] at magnet coil         type of connectable conductor cross-sections of magnet         coil at AWG cables single or multi-stranded         temperature of the conductor at magnet coil         material of the conductor at magnet coil         type of electrical connection for auxiliary contacts	Surface mounting and installation Box lug 45 45 lbf·in 75 °C AL or CU Screw-type terminals 35 50 lbf·in Screw-type terminals 5 12 lbf·in 2x (16 12 AWG) 75 °C CU Screw-type terminals		
mounting positionfastening methodtype of electrical connection for supply voltage line-sidetightening torque [lbf·in] for supplytemperature of the conductor for supply maximumpermissiblematerial of the conductor for supplytype of electrical connection for load-side outgoing feedertightening torque [lbf·in] for load-side outgoing feedertightening torque [lbf·in] for load-side outgoing feedertype of electrical connection of magnet coiltightening torque [lbf·in] at magnet coiltype of connectable conductor cross-sections of magnetcoil at AWG cables single or multi-strandedtemperature of the conductor at magnet coiltype of electrical connection for auxiliary contactstightening torque [lbf·in] at contactor for auxiliary contacts	Surface mounting and installation Box lug 45 45 lbf·in 75 °C AL or CU Screw-type terminals 35 50 lbf·in Screw-type terminals 5 12 lbf·in 2x (16 12 AWG) 75 °C CU Screw-type terminals 10 15 lbf·in

contacts maximum permissible					
material of the conductor at overload relay for auxiliary contacts	CU				
Short-circuit current rating					
design of the fuse link for short-circuit protection of the main circuit required	10kA@600V (Class H or K); 100kA@600V (Class R or J)				
design of the short-circuit trip	Thermal magnetic circuit breaker				
breaking capacity maximum short-circuit current (lcu)					
• at 240 V	14 kA				
• at 480 V	10 kA				
• at 600 V	10 kA				
certificate of suitability	NEMA ICS 2; UL 508; CSA 22.2, No.14
