

Extreme Cooling Fan Kit For Raspberry Pi 3 B+

SKU 110991228

Description:

- 3510 Version Extreme Cooling Fan Kit For Raspberry Pi 3B+ is a brand-new Cooling system for your Raspberry Pi 3B+.
- It's a completely new radiator, and it's a very cool cooling system after the armor shell.
- And it fit for all of your cases so that you do not need to buy another case for your raspberry pi.
- The fan is 3510 version and more powerful but still quiet when it is running.
- Two aluminum blocks will touch the MCU tightly and good for the heat spreading.
- works excellent, contour artistic, easy to operate, safe to use.

Features:

- Design for Raspberry Pi 3B+
- The fan is very quiet at runtime
- Easy to assemble
- Appearance is quite cool
- Good heat dissipation
- Safe to use

Package Includes:

- 1x 3510 Version Extreme Cooling Fan
- 1x Copper Heatsink
- 2x Thermal Tapes
