

DCSK36-20-14-A

Ruland DCSK36-20-14-A, 1 1/4" x 7/8" Single Disc Coupling, Aluminum, Clamp Style With Keyway, 2.250" OD, 2.313" Length

Description

Ruland DCSK36-20-14-A is a clamp single disc coupling with 1.2500" x 0.8750" bores, 2.250" OD, 2.313" length, and 1/4" x 3/16" keyways. It is zero-backlash and has a balanced design for reduced vibration at high speeds. The single disc design is comprised of two anodized aluminum hubs and two sets of thin stainless steel disc springs which can accommodate angular misalignment and axial motion, however does not allow for any parallel misalignment. DCSK36-20-14-A is lightweight and has low inertia making it well suited for applications with speeds up to 10,000 RPM. Hardware is metric and tests beyond DIN 912 12.9 standards for maximum torque capabilities. Ruland manufactures DCSK36-20-14-A to be torisionally rigid and an excellent fit for precise positioning stepper servo applications commonly found in semiconductor, solar, printing, machine tool, and test and measurement systems. It is machined from solid bar stock that is sourced exclusively from North American mills and RoHS3 and REACH compliant. DCSK36-20-14-A is manufactured in our Marlborough, MA factory under strict controls using proprietary processes.

Product Specifications

1.2500 in	Small Bore (B2)	0.8750 in
1/4 in	Keyway (K2)	3/16 in
1.050 in	B2 Max Shaft Penetration	1.085 in
2.250 in	Bore Tolerance	+0.001 in / -0.000 in
2.313 in	Hub Width (LH)	1.050 in
+0.0000 in / -0.0005 in	Forged Clamp Screw	M6
Alloy Steel	Hex Wrench Size	5.0 mm
Black Oxide	Seating Torque	16 Nm
2 ea	Dynamic Torque Reversing	112.5 lb-in
1.0°	Dynamic Torque Non-Reversing	225 lb-in
0.00 in	Static Torque	450 lb-in
0.015 in	Torsional Stiffness	1000 lb-in/Deg
0.4940 lb-in ²	Maximum Speed	10,000 RPM
Yes	Balanced Design	Yes
<u>TW:BT-4C-3/8-140</u>	Recommended Hex Key	Metric Hex Keys
Yes	Material Specification	Hubs: 2024-T351 Aluminum Bar, Disc Springs: Type 302 Stainless Steel
-40°F to 200°F (-40°C to 93°C)	Finish Specification	Sulfuric Anodized MIL-A-8625 Type II, Class 2 and ASTM B580 Type B Black Anodize
Ruland Manufacturing	Country of Origin	USA
0.643300	UPC	634529205310
8483.60.8000	UNSPC	31163008
Stainless steel hubs are available	upon request.

Installation Instructions		
	 Align the bores of the DCSK36-20-14-A single disc coupling on the shafts that are to be joined and determine if the misalignment parameters are within the limits of the coupling. (<i>Angular Misialignment:</i> 1.0°, <i>Parallel Misalignment:</i> 0.00 in, <i>Axial Motion:</i> 0.015 in) Fully tighten the M6 screw on the first hub to the recommended seating torque of 16 Nm using a 5.0 mm hex torque wrench. Before tightening the screw on the second hub, rotate the coupling by hand to allow it to reach its free length. Tighten the screw on the second hub to the recommended seating torque. Make sure the coupling remains axially relaxed and the misalignment angle remains centered along the length of the coupling. The shafts may extend into the relieved portion of the bore as long as it does not exceed the shaft penetration length of 1.050 in for bore 1 and 1.085 in for bore 2.
