# 24v 30w Heater Cartridge, 225mm

Heavy duty performance in a precisely engineered package, this heater cartridge is used in the LulzBot Hexagon Hot End and is terminated with a pin compatible with our LulzBot TAZ 5, TAZ 6, and LulzBot MIni. When used with a 24V-powered 3D printer, the heater cartridge heats quickly allowing for faster, more consistent 3D printing performance.

Compatibility:
LulzBot Mini v1.0, Boxed for Retail, NA
LulzBot TAZ 3D Printer, v6.0 Boxed for Retail, NA
TAZ 3D Printer, v5.0, Boxed for Retail, NA
