

UL1015 Topcoat Hook Up Wire from Remington Industries is used across a variety of engineering and electronics industries. The topcoat tinning means that the bare copper strands in this wire are twisted together and given an overall coating of tin, which provides good electrical connectivity and easy soldering. Additionally, the PVC jacket protects the wire against abrasion, chemicals, oils, and solvents. By conforming to UL specifications, the hook up wire provides excellent uniformity for processing, stripping, and terminating. This hook up wire is available in several wire gauges (from 18 to 24 AWG) to meet your specific requirements. It is also available in a variety of colors (see below) to allow for easy circuit identification, as well as numerous spool sizes (see below) for your convenience.

- Conductor Material: Bare Copper with Topcoat
- Insulation Material: PVC (0.030" Thick)
- Type: UL1015 TC Stranded Hook Up Wire
- Voltage Rating: 600 V
- Temperature Rating: 105°C (221°F)
- Colors Available: Black, Blue, Brown, Gray, Green, Orange, Red, Violet, White, Yellow
- Spool Sizes Available: 25 ft, 100 ft, 250 ft, 500 ft, 1000 ft, 2500 ft, 5000 ft
- Also available in pre-built kits (6 or 10 different colors / 25 ft or 100 ft per spool)

Remington Industries is proud to offer our Custom Wire Services

Our exclusive inventory of in-stock wire and ability to procure wire of all kinds makes us the perfect partner for wire purchasing and custom wire services. We are proud to provide essential, high quality wire for engineering projects, educational science projects, coil winding, and electronics applications.

Some of our many wire services include the following:

- Wire Re-Packaging
- Bifilar & Trifilar Windings
- Wire Processing
- Coil Winding
- Wire Procurement Services

If you have any questions or need any information about our **Wire Services**, feel free to contact us! It only takes one call to get experienced assistance.
