

Designed with an extremely sharp cutlery steel blade, this cable splicing knife is perfect for cutting through some of the strongest types of cables including many types of insulation. This knife features the following:

- Short 1 3/4" blade with 6 1/4" handle for better control and reduced hand fatigue
- Coping blade is made from high strength cutlery steel and is tempered to maintain its edge with repeated use
- Ergonomically designed TPR (Thermoplastic Rubber) non-slip easy grip handle for increased comfort and control
