The Big Deal

- Good VSWR, 1.35:1 typical
- High rejection, 40 dB typical
- Linear phase
- Symmetrical band pass response
- Small size 0.35" x 0.35" x 0.10"

Product Overview

The RBP-140+ is a narrow-band bandpass filter in a small shielded package (size of 0.35" x 0.35" x .10") fabricated using SMT technology. The RBP-140+ offers a symmetrical bandpass and linear phase characteristics. In addition it has repeatable performance across production lots and consistent performance across temperature.

Key Features

Feature	Advantages
Small size, 0.35” x 0.35” x 0.10”	The unique surface mount package enables the RBP-140+ to be used in compact designs.
More than 40 dB rejection up to 3000MHz	This enables the filter to attenuate spurious signals and reject harmonics for broad band of frequency.
Symmetrical band pass response	Uniform passband insertion loss.
Minimal phase deviation over attenuation range, ± 7deg typical at Fc ±15 MHz	Can provide low signal distortion over the attenuation range
Good VSWR, 1.35:1 typical in Passband	The RBP-140+ has very good return loss for a narrow bandwidth which provides good matching when used with other devices.
