MICRO SWITCH Sealed Subminiature Basic Switches

DESCRIPTION

Honeywell MICRO SWITCH ZD Series is a sealed subminiature snap-action switch. Although small in size, the ZD Series is rated for controlling electrical loads ranging from logic-level (low current, low voltage) to limited power-duty switching (up to 3 A/125 Vac).

The switch when provided with integral wire leads is sealed to IP67 and is suitable for applications where the switch assembly would be exposed to liquids or particulate contaminants in the environment.

A wide variety of stainless steel levers are available, and when combined with the subminiature package size, can adapt the switch for many different applications. The ZD Series is certified to UL, cUL, CE, UKCA, ENEC and CQC for worldwide use.

VALUE TO CUSTOMERS

- Well suited for power-duty and logic-level loads
- Performs in wet, dirty, and dusty environments
- Enhances safety through enablement of monitoring and guidance capabilities that improve productivity of operators

FEATURES

- Subminiature package size
- SPDT, SPNC, or SPNO switch options
- Power-duty switching with silver contacts or logic-level (low voltage and milliamperes) with gold-plated contacts
- Pre-leaded wires sealed to IP67
- Built with an integral sealed pin plunger
- Various styles of levers and variety of terminations
- Integral mounting pins (pillars) on the switch housing simplify and reduce installation time

POTENTIAL APPLICATIONS

- Electric window control for automobiles
- Automobile seat belt latch detection
- Engine hood or trunk latch detection
- Vehicle door latch detection
- Vehicle mounted wheelchair lifts

DIFFERENTIATION

- The IP67-rated sealed switch is designed to operate in a variety of demanding applications, reducing the challenge of harsh environments
- Current carrying capacity, up to 3 A, allows for a solution in many applications where space is a premium
- Switch package designed to accommodate demanding temperature requirements, up to 85°C [185°F]

PORTFOLIO

The ZD Series of subminiature basic switches are a part of a strong offering of submins including ZM/ZM ZX, and ZW Series switches.

NOTES:

- ¹ Not all combinations of model code are available. Please contact your Honeywell provider/representative for assistance.
- ² Terminal Type "99", Actuator Type "S", and/or Pillar/Travel Type "99" designates a special and requires a special designation at the end of the listing.
- ³ Operate force is measured at the plunger. Adding an actuator/lever will change the operate force. See page 6 for operate force.
- ⁴ Standard wire exit is out the bottom of the switch. No special designator is necessary for this wire exit direction.
- ⁵ SPNO and SPNC are only available if termination type is wired.
- ⁶ Standard wire length is 500 mm [19.5 in] long. Other lengths available upon request.
- ⁷ Long solder terminals do not have UL, CE, UKCA or ENEC approvals.
- ⁸ Switches with AVSS wire do not have UL approvals.

WARNING IMPROPER INSTALLATION

- Consult with local safety agencies and their requirements when designing a machine-control link, interface and all control elements that affect safety.
- Strictly adhere to all installation instructions.

Failure to comply with these instructions could result in death or serious injury.

WARNING MISUSE OF DOCUMENTATION

- The information presented in this product sheet is for reference only. Do not use this document as a product installation guide.
- Complete installation, operation, and maintenance information is provided in the instructions supplied with each product.

Failure to comply with these instructions could result in death or serious injury.
